

Condenser.

The image shows a complex industrial environment, likely a power plant. A large, horizontal, cylindrical condenser is the central focus, with various pipes and valves connected to it. To the right, a vertical pipe is identified as the turbine exhaust line. In the foreground, there are several large, grey electrical control cabinets with multiple gauges and switches. A yellow caution tape is stretched across the lower part of the scene. The ceiling is high with white structural beams and overhead lighting.
